

**Lead Based Paint Inspectors:****March 25, 2007**

A certified lead based paint inspector performs surface by surface analysis of all structural components in a dwelling to determine the presence of lead in surface coatings. A certified inspector may also collect dust and soil samples during the performance of abatement clearance testing.

NOTE: Listing in this directory does not imply that the employer is a licensed abatement firm! Always verify that an inspector is employed by a licensed lead activity firm prior to any abatement inspection activity. Contact [lead@kdhe.state.ks.us](mailto:lead@kdhe.state.ks.us) or 1-866-865-3233 for more details.
