

RISK ASSESSOR:

August 1, 2008

Certified individual that conducts on-site investigations of residential dwellings to determine presence of lead-based paint hazards.

A risk assessment includes investigating the age, history, management and maintenance of a dwelling; conducting a visual assessment; performing limited environmental sampling, such as soils sampling, dust wipe sampling and deteriorating paint sampling; and reporting the results that identify acceptable abatement or interim control strategies based upon the specific conditions and the owner's capability.

NOTE: Listing in this directory does not imply that the employer is a licensed abatement firm! Always verify that a Risk Assessor is employed by a licensed lead activity firm prior to any lead inspection activity. Contact lead@kdhe.state.ks.us or 1-888-865-3233 for more details
